2014-15 21st CCLC Programs

Throughout the 2014-15 school year, the 21st CCLC after school program is taking place within the Easton Area School District (EAMS 5/6 and EAMS 7/8) and the Allentown School District (Raub and Trexler MS). Program takes place Monday through Thursday after school from approximately 2:50-5:50. This year’s program will continue to be divided into three main parts: 1 hour of homework help/academics, 1 hour of STEM-focused enrichment activities, and 30 minutes of daily physical activity. Students are also provided with a dinner before heading home each night (after school snack also served in EASD).

September and October Community Partners

**Easton 5/6 and 7/8 MS**
- Lafayette College
- DaVinci Science Center
- Elevations Health Club
- Natalie Hartman, Local Artist
- Pocono Wildlife Rehabilitation Center
- Cooking Matters

**Trexler and Raub MS**
- DeSales University
- DaVinci Science Center
- Baum School of Art

“Funded in full or in part with a grant by the Pennsylvania Department of Education”
Lights On After School
Celebrating After School Programs

Lights On After School is a national advocacy event put on by the After School Alliance to show how after school programs support children, families, and communities. All four of our sites participated in Lights On After School events. Nationally, there were 8,100 events this October to celebrate after school programs.

DaVinci Light and Electricity Show

For our Lights On After School Event, The DaVinci Science Center presented an interactive, STEM-focused presentation about light and electricity to our students. The presentation focused on electrical efficiency, the use of energy, and the flow of energy. Students really enjoyed the hands-on activities!

Raub and Trexler Middle Schools

Students at Raub and Trexler Middle School had a great first month of program! Both Allentown programs are at capacity and students are making the most of each day. Highlights from October include the DaVinci Science Fabrication unit, science experiments, air straw structures, and a Kinex/Lego building contest. Allentown students also had the opportunity to visit and tour DeSales College in late October on a fun-filled field trip!

Easton 5/6 and 7/8 Middle Schools

Students at Easton Middle School have been participating in several hands-on, STEM related activities in the month of September and October. Teacher-lead activities that took place in Easton during this time include: Popsicle bridge building, recycling service learning projects, rocket design/launching, wood burning, computer projects, and small group problem solving activities!
